4. FIRST AID MEASURES

EYES: Immediately flush with plenty of water for at least 15 minutes, holding eyelids open at all times. Get medical attention immediately.

SKIN: Wash skin with waterless hand cleaner followed by soap and water. If redness appears, treat it as a sunburn. If redness persists or rash appears, seek medical attention immediately.

INGESTION: DO NOT INDUCE VOMITING. Prevent aspiration into lungs. Aspiration of even small amounts into lungs may result in aspiration pneumonitis. Seek medical attention immediately.

INHALATION: Remove individual to fresh air, upwind from fume source. If irritation persists seek medical attention immediately.

5. FIRE FIGHTING MEASURES

EXTINGUISHING MEDIA: Class B dry chemical, carbon dioxide, or other suitable extinguishing material such as dry sand. Do not use halogenated agents. When flames have been eliminated, cover residue with dry extinguishing agent or dry sand and allow it to remain undisturbed until it has cooled. If fire appears to increase in intensity, stop using these agents. Apply Class D extinguishing agent or more dry, inert, granular material. Ring fire with extinguishing material and allow the fire to burn out.

FIRE FIGHTING PROCEDURES: If the fire does not respond to agents or if they are not available, use foam or water fog as a last

RP 400

resort. Water may also be used to cool exposed, but not burning, containers. These products may float and be re-ignited on top of water.

FIRE FIGHTING EQUIPMENT: Standard protective fire fighting clothing and breathing apparatus.

FIRE EXPLOSION: Closed containers may explode in a fire. Keep containers cool and move to a safe location.

6. ACCIDENTAL RELEASE MEASURES

LARGE SPILL: Contain spill as quickly as possible. Keep flowing material away from heat, sparks, or open flames. Do not smoke near a spill. Use clay, sand, earth, etc. to absorb the spill. Put material into a suitable steel drum which can be closed securely.

7. HANDLING AND STORAGE

STORAGE: Store away from heat, sparks and open flames. Solvent vapors are heavier than air and may be moved from the source location by ventilation systems to points far away. Do not store near oxidizers. Keep container closed when not in use. Store in a dry, ventilated area. Maintain package labeling during storage.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION**EXPOSURE GUIDELINES**

OSHA HAZARDOUS COMPONENTS (29 CFR1910.1200)							
		EXPOSURE LIMITS					
		OSHA PEL		ACGIH TLV		SupplierOEL	
Chemical Name		ppm	mg/m ³	ppm	mg/m ³	ppm	mg/m ³

PERSONAL PROTECTIVE EQUIPMENT

EYES AND FACE: Wear safety glasses with side shields or goggles when handling this material.

SKIN: Chemical resistant protective gloves are recommended.

RESPIRATORY: As required if airborne concentrations are above the TLV of 5 mg/m³. If respirators become necessary, use NIOSH approved unit for organic vapor and dusts.

PROTECTIVE CLOTHING: As necessary to prevent wetting of the skin.

WORK HYGIENIC PRACTICES: Wash hands thoroughly after each use, especially before eating or smoking. Good personal hygiene practices should always be followed.

COMMENTS: Use natural cross ventilation, local pick-up, and/or general area mechanical cross ventilation. Ventilation pattern should be designed to prevent accumulation of heavier than air solvent vapors. Ventilation must be sufficient to maintain solvent vapro concentrations below the TLV.
